

Surface Maintenance

Vet & Pet Care

Sani-Shield

No matter how much you clean, sanitize or disinfect surfaces... everyday soil and surface-contact germs keep coming back.

That's why you need Unelko's newly-patented Sani-Shield® and Sani-Scrub® 3-in-1 Surface Care products; the only surface care technologies that deep clean germ-carrying fingerprints, body fluids, food spills, soil splatters, dirt and grime... and simultaneously protect the cleaned surfaces with an invisible "organic" barrier coating on which bacteria, virus, mold & mildew will not grow... and which dramatically reduces the adhesion & buildup of re-soiling for easier next-time cleaning!

These ready-to-use products replace all those ordinary 1-time "clean" cleaners & cleansers and the 1-time "kill" sanitizers & disinfectants that require pre-cleaning and flooding of the surface. At last, you can take the guess-work out of which product to use for cleaning and for "killing" the array of germs that you can't see or identify. In 1-Step, you can clean everyday soil and germs, protect surfaces against buildup and prevent the growth of bacteria, virus and fungi.

- Examining Rooms
- Nurses Stations
- Kennels
- Grooming Tables
- Cleaning Carts & Equipment
- Scales
- Waiting Rooms
- Bathrooms
- Counters
- Floors
